

Dinosaur Head origami

1 Start with an 8.5" x 11" paper in portrait mode.

2 Fold in half top to bottom.

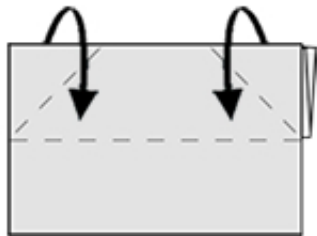

3 Fold one side in half again.

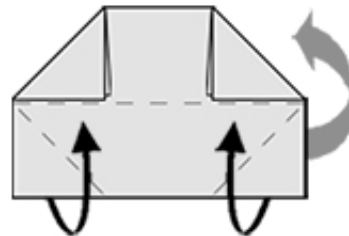

4 Flip over and fold the other side in half.

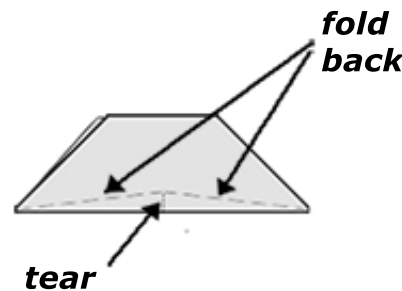

5 Unfold the fold you just made.

6 Fold in the top two corners. Include all three layers of paper.

7 Fold up the bottom two corners. Fold the bottom half back up. It should now form a trapezoid.

8 Make a small tear in the bottom center. Fold back a triangular shape from the corner to the tear. Do this on both sides, then flip over and repeat.

9 Reach into the center and press open.

10 Give your creature some eyes.
